Education

University of Georgia, Morehead Honors College Aug. 2026 – May 2029
Bachelor of Science in Electrical Engineering *GPA 4.0*
69 Transfer Credits (49 Applied to Major)
Conditional transfer admission to Georgia Tech (Fall 2027)

Georgia Institute of Technology Jan. 2025 – May 2026
Dual Enrollment *GPA 4.0*
Linear Algebra, Multivariable Calculus, Intro Computing (Python), Intro Object-Oriented Programming (Java)

Georgia State University Aug. 2024 – May 2026
Dual Enrollment *GPA 4.0*

Chamblee High School (Magnet Program) Aug. 2022 - May 2026
High School Diploma *GPA 4.44*
Varsity Swim, JV Cross Country, National Honors Society, Jazz Band (1st Chair Trombone), Ultimate Frisbee

Honors & Awards: National Merit Scholarship Finalist, Zell Miller Scholarship, Top 10% of High School Class

Experience

Mission Operations & Ground Station Engineer Sep. 2026 – Present
Small Satellite Research Laboratory *Athens, GA*

- Develop and document testing procedures for the communications subsystem of MEMESat-1 (UHF Transceiver)
- Day-to-day participant in ground station procedures: operating ham radios, cleaning dish antennas, etc.

Computer Science & Engineering Teacher June 2024 – Aug. 2026
Code Ninjas *Atlanta, GA*

- Led up to 30-student Coding & Robotics classes (ages 7-13) with game-based projects. Modified provided activities in real time to engage learners
- Taught programming and logic using TypeScript (MakeCode Arcade), Lua (Roblox Studio), and Minecraft Redstone logic gates
- Independently managed classrooms and day-to-day schedules

Projects

Ad-blocking Server for Classroom | *Proxmox, Linux, DNS filtering* June 2026 – Aug. 2026

- Set up, deployed, and maintained a server on Code Ninjas's local network
- Protected young students from ads, malware, trackers, and adult sites
- Served 50 concurrent users with consistent uptime during regular business hours
- Trained fellow teachers to interact with the server by modifying website blocklists as needed

Hospital Building Energy Efficiency Simulation | *OpenStudio, Jupyter Notebooks* June 2025 – July 2025

- Georgia Governor's Honors Program Final Project for Physics
- Parsed data from the Intergovernmental Panel on Climate Change and the U.S. Environmental Protection Agency programmatically using Python and its libraries
- With a partner, wrote technical report about our designed computer simulation testing the energy efficiency of hospital buildings' exterior envelope materials

Technical Skills

Languages: Java, Python, Matlab, Bash
Developer Tools: Linux (Arch, Debian, Ubuntu), Git, Vim/Vi, Oracle Cloud, Caddy
Other Skills: Technician Class Ham Radio Certified, Building and Overclocking Computers
